

ID	name	description
1	CO2 Monitor	Bedside carbon dioxide respiratory monitors.
2	Breathing Monitor	Bedside monitors for continuous measurement of carbon dioxide and/or oxygen.
3	Electrohydraulic Lithotripter	Intracorporeal lithotripters using plasma-induced shockwaves for fragmentation.
4	Urodynamic Measurement System	Measurement systems for various urodynamic evaluation functions.
5	Laser Lithotripter	Intracorporeal lithotripters using laser energy.
6	Extracorporeal Lithotripter	Extracorporeal lithotripters for kidney stones.
7	Ultrasonic Lithotripter	Intracorporeal lithotripters using US transducer and a hollow steel probe.
8	Intracorporeal Lithotripter	Intracorporeal lithotripters with a mechanical, pneumatic, or hydraulic- powered probe.
9	Radiotherapy Planning System	Computer system for radiotherapy planning.
10	Radiotherapy Verification System	Radiotherapy computer system for verification of treatment parameters during therapy.
11	Portal Imaging System	Image digitization systems for real-time verification of radiation treatment.
12	Microcentrifuge	Microcentrifuges for small volume samples.
15	Spectrophotometer	Laboratory spectrophotometers for visible and UV light.
16	Cytometer	Devices intended to measure the number of cells (particles) in a flow of suspension. Detection is done either by electrical methods, or by an optical system (e.g. laser system).
17	POC Coagulation Analyzer	Analyzers for point-of-care analysis of coagulation process
18	Laboratory Washer	Automatic washers specifically designed for laboratory and surgical equipment.
19	Laboratory Safety Cabinet	Safety cabinets designed to isolate and protect from various biological pathogens.
20	Centrifuge, Table Top	Refrigerated and non-refrigerated centrifuges for clinical laboratory testing.
21	Blood-Bank Refrigerator	Blood bank refrigerators.
22	Slide Stainers, Histology	Automated slide stainers suitable for different staining techniques.
23	Oximeter	A laboratory instrument used to simultaneously determine oxygenation of hemoglobin forms.
25	Laboratory Information	A clinical and administrative information system for hospital laboratories.

	System	
26	Tissue Processor	Automated devices for processing tissue specimens.
27	Electrolyte Analyzer	General purpose electrolyte analyzers.
28	Biochemistry Analyzer, Automated	Automated chemical analyzers for clinical laboratory use.
29	Amino Acid Analyzer	Analyzer of primary and secondary amino acid levels in physiologic fluids.
30	Glucose Monitor	Point-of-Care whole blood analyzers measuring glucose concentration in blood.
31	Urine Analyzer, Automated	Semi automated or fully automated urine analyzers for laboratory use.
32	Hematocrit Centrifuge	High-speed microhematocrit centrifuges.
33	Anaerobic Chamber	Airtight chambers providing anaerobic environment for laboratory testing needs.
34	Laboratory Incubator	Aerobic incubators for microorganism and cell cultures.
35	Osmometer	Osmometers for laboratory use.
36	Hematology Analyzer	Semi-automated and fully automated hematology analyzers.
37	Cryostat	Cryostat microtomes, some with knife sharpeners.
38	Centrifuge	Floor centrifuges, refrigerated/non refrigerated, high/low speed.
39	Electrophoresis System	A system for separation of ionic solute mixtures using electrophoresis.
40	Laboratory Hood, Ductless	Hoods which are used for the protection of the personnel while using hazard materials.
41	HPLC	High pressure liquid/gas chromatography system. (High Pressure Liquid Chromatography)
42	Immunoassay Analyzer, Enzyme	Analyzers for enzymes using fluorescence and chemiluminescence immunoassay techniques.
43	Laboratory Hood	Hoods which are used to remove or filter harmful materials from clinical laboratories.
44	Urine Analyzer	A device for urine analysis at the point-of-care (bedside urine analysis).
45	Cell Washing Centrifuge	Cell washing, low speed, non-refrigerated table top centrifuge.
46	Automated Coagulation Analyzer	Semi or fully automated plasma sample analyzers.
47	Chemistry Analyzer, Manual	Manual chemical analyzers for clinical laboratory use.

48	Mass Spectrometer	Mass spectrometers for clinical laboratory use.
49	Electron Microscope	Electron microscopes with transmission and scanning capabilities.
51	Blood POC Analyzer	Point-Of-Care analyzers for hemotological tests.
52	Laboratory Incubator, Thermocycling	Laboratory incubators for heating and cooling test samples, cell culture, DNA and gene manipulation studies.
53	Blood Centrifuge	Floor or tabletop nonrefrigerated low speed centrifuges for blood banks.
54	Ultracentrifuge	Ultracentrifuges for floor or tabletop.
55	Ultraviolet Lamp	Ultraviolet lights with germicidal function.
56	Platelet Aggregation Analyzer	Blood coagulation (platelet aggregation) analyzers for laboratory use.
57	Sweat Tester	Sweat-testing devices for the diagnosis of cystic fibrosis.
58	Microscope	Light microscopes using various contrast methods for use in clinical laboratories
59	Refractometer, Laboratory	Refractometers for laboratory use.
61	Microtome	Microtomes used in histopathology laboratories, for cutting tissue specimens.
63	Microtome Knife Sharpener	Mechanical microtome knife sharpeners.
64	Blood Gas Analyzer, POC	Blood testing devices for use at Point-Of-Care.
66	Ultrasonic Cleaning System	Ultrasonic cleaning systems for surgical and laboratory instruments.
67	Microbiological Culture Analyzer	Automated microbiological systems for laboratory use.
68	Nephelometer	Analyzers for immunoassays using nephelometric system.
69	Blood Gas Analyzer	Blood gas/pH analyzers for laboratories.
70	Densitometer, Laboratory, Scanning	Scanning and video densitometers for use in clinical laboratory.
71	Cytological Centrifuge	Low speed, nonrefrigerated tabletop centrifuge to concentrate biological fluids for slides.
72	Atomic Absorption	Atomic absorption spectrophotometers.
73	Glycohemoglobin Analyzer	Laboratory and point-of-care analyzers that measure levels of glycohemoglobin in blood.
74	Cryosurgical Unit	Cryosurgical units for general and ophthalmic use, which cause target tissue freezing.

75	Emergency Cart	Carts with appropriate features for emergency cardiopulmonary resuscitation procedures.
76	Phototherapy Unit	Hyperbilirubinemia phototherapy units for newborns.
77	Medicine Cart	Carts designed to transport medication and supplies to patient's bed.
78	Bed Alert System	Audio/visual warning system tracking movements of unattended patients.
79	Alternating Pressure Bed	Bed with electrically controlled inflatable air cushions.
80	Alternating Pressure Mattress	Inflatable mattresses designed for pressure relief.
81	Peritoneal Dialysis Unit	A device for automated peritoneal dialysis.
82	Ear Thermometer	Electronic infrared thermometers.
83	Hemodialysis Machine	Devices for hemodialysis.
84	Ultrasound, Portable	Portable, small, and lightweight ultrasonic scanning systems of small superficial organs.
85	Transport Ventilator	Mobile ventilators for use during transportation, in or out of the hospital.
86	Ventilator, Intensive Care	Intensive care ventilators providing respiratory gases to lungs.
87	Warming Cabinet	Warming devices for blankets and other items.
88	Ventilator, Pediatric	Neonatal and pediatric ventilators for use in intensive care.
89	Infant Incubator	Infant and newborn incubators.
90	Colonoscope	<p>Flexible fiberoptic or video endoscopes intended for viewing and treating disorders of the entire large intestine.</p>
91	Feeding Pump	Enteral feeding pumps.
92	Esophageal Motility Analyzer	Peristaltic analyzers for esophagus, gastric and /or small intestine motility.
93	Choledochoscope	Upper GI endoscopes with various light sources and video processors.
94	Laparoscope	Endoscopes for observation and treatment ( e.g. percutaneous insertion through abdominal wall).
95	Apnea Monitor	Devices which detect breathing stops (apnea).
96	Stereotactic Radiotherapy	Linear accelerator based stereotactic systems for radiosurgery.
97	EMG & Evoked Potential Response Unit	Classic EMG units, and equipment for testing the evoked potential response.
98	ENG Unit	Electronystamographs are used as a testing device to detect and record nystagmus.

- 99 Auditory Function Screening Device for detection of hearing impairment in newborns.
- 100 Stereotactic Head Frame A headframe attached to skull for stereotactic use during surgery.
